CLASSIFICATION & TEXTURES

FBX

FACE BRICK EXTRA

FBX is the golden standard of bricks. They can be used for both exterior and interior building projects where a high degree of uniformity in size, shape and colour is required.

FBS

FACE BRICK STANDARD

Face bricks that are selected or produced for their durability and uniformity of size and shape. They can be used for all general masonry projects. Tolerances are not as strict as with FBX bricks but the brick is still of a high quality.

FBA

FACE BRICK AESTHETIC

Wider tolerances are allowed on FBA bricks (also called semi-face bricks). They are a popular choice where a rough or more rustic look is required. Clay bricks that are selected or produced for their durability and aesthetic effect deriving from non-uniformity of size, shape, or colour.

NFP

NON FACING PLASTERED

Clay bricks suitable for general building work that is to be plastered.

NFX

NON FACING EXTRA

Clay bricks suitable for use, plastered or unplastered, for general building work below damp-proof course or under damp conditions or below ground level where durability rather than aesthetics is the criterion for selection.

BENEFITS OF COROBRIK FACE BRICK

LOW MAINTENANCE

No fuss, no maintenance – just timeless beauty that saves you money.

AESTHETIC APPEAL

Make a statement with bold colours, rich textures, and unique shapes.

FIRE RESISTANCE

Fire-safe and worry-free – clay bricks don't burn or add to fire risk.

ENERGY EFFICIENCY

Stay comfortable all year round while saving on heating and cooling costs!

SOUND INSULATION

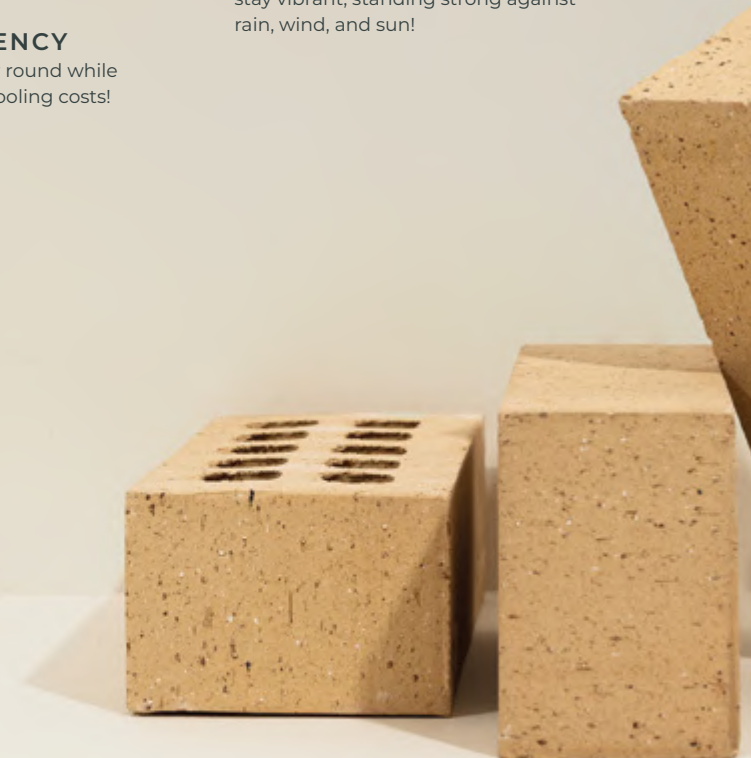

Turn down the noise – the dense composition of face brick walls provides excellent sound insulation for peace and quiet.

SUSTAINABILITY

Feel good about your build with bricks that are kind to the planet.

DURABILITY & LONGEVITY

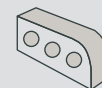

Face brick never fades – built to last and stay vibrant, standing strong against rain, wind, and sun!

WHAT IS AN ENGOBED BRICK?

Engobed bricks are clay bricks that have a thin layer of coloured clay applied before firing. This colour layer, called an engobe, is made by mixing clay minerals and oxides with water to form a liquid. Once applied, the engobe fuses permanently to the brick during the firing process, creating a strong, durable finish. Engobes can fully or partially cover the surface and are available in a wide range of colours – almost any shade you can imagine.

WHY CHOOSE AN ENGOBED BRICK ABOVE A PAINTED BRICK?

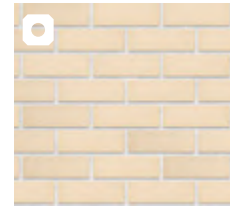

With an engobed brick, the colour becomes part of the brick itself, creating a long-lasting finish that doesn't need repainting or maintenance. Painted bricks, by comparison, may need ongoing upkeep as the paint layer can wear or peel over time. If you're looking to add colour to your brickwork and want it to last, an engobed brick offers a more permanent, low-maintenance solution – with the added benefit of being able to choose from nearly any colour.

COLOUR THAT STANDS THE TEST OF TIME

Face brick is made using natural clay and fired at extremely high temperatures, which means the colour is part of the brick — not just a surface layer. It won't fade, peel or weather over time, no matter the conditions. You get a rich, lasting finish that never needs repainting.

MORTAR COLOUR MATTERS

The mortar you choose can completely change the look of your face brick. A matching mortar blends in for a seamless, uniform finish, while a contrasting colour can highlight the shape and pattern of each brick. It's a small detail that makes a big impact on the overall design.

BRICKLAYER TRAINING SCHOOL

Corobrik proudly invests in the future of construction through our three bricklayer training schools across South Africa. Located in Durban, Johannesburg, and Cape Town, these centres equip learners with essential bricklaying skills, empowering them to build strong, lasting careers while ensuring quality workmanship in our communities.

ON-SITE BRICKLAYER TRAINING

Quality of workmanship is just as important as quality of product when it comes to face brick. That's why Corobrik offers on-site bricklayer training with the purchase of our face brick products. To learn more, please contact your nearest Corobrik Sales Centre or Representative.

For more information about our Bricklayer Training School or On-Site Training Programs, please contact us at: 011 871 8600 | training@corobrik.co.za
